

Early Release from Yearlong Clinical Experience (YCE) II

All candidates must complete the full yearlong clinical experience (YCE) II calendar of responsibilities to the school placement in order for KSU to process an application for teacher certification. Program areas may opt to grant early release for employment purposes; however, early release is not guaranteed. Early release is approved on a case-by-case basis, depending on a candidate's readiness to teach. In no case will a candidate be released more than seven days prior to the last scheduled day of YCE II without compromising standards, state regulations, coursework, or KSU's guarantee to the Georgia Professional Standards Commission (GaPSC) that all candidates have a yearlong clinical experience.

All early release applications must be approved by the program coordinator, the department chair and the Director of the Clinical Experiences, Placements, and Partnerships office (CEPP).

Candidates must follow these steps to apply for an early release:

1. The candidate receives an offer of employment from the Human Resources Department of the School System.
2. The candidate emails the Director of CEPP to verify his/her eligibility for early release.
3. Once verified, the Director of CEPP emails an early release application to the candidate.
4. The candidate secures approval from appropriate B-12 school personnel and submits the employment offer and the signed application form to the Director of CEPP.
5. The CEPP Director submits the application to the candidate's program coordinator, field supervisor, and department chair for review (and signature if approved).
6. The CEPP Director notifies the candidate of the final decision and also notifies the school system of the approval (or disapproval) of the request and files the application.
7. Early release decisions by program areas cannot be appealed.
